

Cell-Pet™

Cell-Pet™ is a unique liquid oxygen mineral supplement, in a **super-energized®** concentrated colloidal form that increases **oxygenation①** in the blood stream; and improves digestion, the immune system, the metabolism, and the bird's general well-being. As a natural plant-based product, **Cell-Pet™** is safe to use with all types of birds, and has been achieving excellent cost-effective results world-wide with Racing Pigeons, Tumblers, Chicken production, Parrots, Budgies, etc.

Benefits of using Cell-Pet™

As a dynamic multi-action agent, **Cell-Pet™** is environmentally and ecologically safe for all types of birds. It has no detrimental side-effects, and has numerous benefits for racing pigeons, tumblers, chickens, parrots, budgies, etc.:

- ◆ Reduces distress, disease & mortalities
- ◆ Improves health & condition
- ◆ Strengthens systems, e.g. immune system

Other reasons for using Cell-Pet™

- ◆ Works fast and effectively
- ◆ Is cost-effective and easy to use
- ◆ Achieves sustainable results
- ◆ Reduces ammonia content in manure, thus reducing possible damage to lung surfaces and susceptibility to respiratory diseases
- ◆ Reduces need for costly medications

Challenges Due to Water Pollution

Today, bird owners are being faced with increasing environmental **pollution** and fluctuations in the **quality** of food and drinking water - making Pigeons more susceptible than ever to **distress and disease**. Deficiencies of Oxygen and Minerals lead to accumulation of metabolic waste and toxins in bodily systems, creating a breeding ground for harmful bacteria, viruses and pathogens, thus making the pigeon more vulnerable to disease.

Costly **medications** are then used to remedy the situation, often retarding the growth and condition of pigeons.

To address these challenges, the unique and amazing supplement, **Cell-Pet™**, should ideally be given to Birds daily, for enhancing their nutritional biochemical activities and enabling them to function optimally.

How Cell-Pet™ achieves results

Cell-Pet™ supplies each bird with essential nutrients, e.g. minerals, and produces nascent oxygen and hydrogen (see * overleaf), in a controlled and time-released manner, all at cellular level, where it is most needed.

Each time a bird drinks the drinking water that contains **Cell-Pet™** in it, **Cell-Pet™** works in its most amazing and unique manner, on the physical, electromagnetic, chemical and biological levels of the bird.

Physical and Electromagnetic Levels:

Cell-Pet™ provides the bird with essential elements and minerals, required for proper composition of bodily fluids, maintenance of healthy nerve functioning, and proper formation of all cells, e.g. blood, muscle and bone cells:

- resulting in improved and accelerated food conversion into increased healthy body mass; and
- resulting in improved quality and size of eggs, as well as stronger shells, and increased laying frequency.

Minerals in **Cell-Pet™** are in physical colloidal form, i.e. minute negatively-charged particles. Because most bodily fluids (like blood and lymph) are colloidal, the bird's bodily systems perceive **Cell-Pet™** as normal healthy body fluid, and allow the micro-nutrients to pass immediately through sensitive tissues of the bird's mouth, throat and oesophagus into the blood stream. Nutrients are therefore rapidly available for assimilation by all parts of the body, at cellular level.

The electromagnetic energy released by the production of nascent hydrogen (see * overleaf) boosts the bird's immune system significantly.

Chemical and Biological Levels:

Oxygen - for producing metabolic energy, and for oxidizing toxins and metabolic body waste for effective elimination. (see * overleaf).

Hydrogen - for irrigating, building and strengthening cells and organs, preventing inflammation, moistening lung surfaces for gas diffusion, and regulating body temperature. (see * overleaf)

Amino Acids – for building proteins, hormones, neurotransmitters and anti-bodies, as well as the pigeon's immune system for resisting viral, bacterial and fungal infections.

Enzymes – for enhancing the digestive and metabolic functions of the bird, enabling it to assimilate more nutritional benefits, than previously, from the foods that it eats.

Ingredients in Cell-Pet™

Cell-Pet™ is a registered blend of natural plant-sourced minerals, nutrients and electrolytes in ionic colloidal suspension; and proprietary elements that supply controlled nascent oxygen and hydrogen at cellular level. All ingredients are organic and totally non-toxic. They are cryogenically, not chemically, extracted to ensure maximum pureness and potency. No alcohol or glucose is used in the product. **Cell-Pet™** is also hypo-allergenic.

Cell-Pet™ can be used in conjunction with other remedies, medications and additives because it increases their bio-availability and effectiveness.

Cell-Pet™ does not contain any vitamins, so additional supplementation programs are therefore to be continued.

What else does **Cell-Pet™** do?

Often, when birds start drinking water mixed with **Cell-Pet™**, they experience some form of **detoxification**, such as loose droppings (which are actually healthier droppings).

This is because **Cell-Pet™** supplies a bird with the essential elements that it needs, and so its bodily systems strengthen and can more easily eliminate waste, acids and toxins that may have been accumulating in its body for some time.

Administering **Cell-Pet™**

Directions: Cell-Pet® is highly concentrated so only a small dosage of 1:4000 to be used initially. Using a syringe, add 0.50 ml of Cell-Pet™ to 2 litres of water. Stir well. This dosage to be increased to 1:3000 from day 4 to day 6, when on day 7 it is to be increased to the daily dosage of 1:2000 i.e. 1 ml to 2 liters. Please follow these instructions carefully.

Bird	Dosage of Cell-Pet® for Birds		
	Days 1 to 3	Days 4 to 6	On-going Daily
Pigeon	1:4000	1:3000	1:2000
Chicken	1:4000	1:3000	1:2000
Budgie	1 Drop in 500ml water		1 Drop in 250ml water
Others Birds: Consult Oxygen For Life SA (Pty) Ltd.			

Smaller birds drink less water and have smaller drinking bowls, which only require 1 drop of Cell-Pet® being added to 500ml water for the first week. The water bowls can then be filled from this source. From the second week onwards, 1 drop Cell-Pet® to be added to 250ml water. Note: Make a fresh batch daily. If the drinking water is of poor quality, apply the same dosage to the water and allow it to stand overnight as this will improve the quality of the water. The same dosage is then to be added again the following day prior to being given to the birds.

Is **Cell-Pet™** a medicine?

Cell-Pet™ is not a medicine. As a nutritional supplement, it provides birds with a constant stream of essential building blocks (e.g. oxygen, minerals, etc.) so that each bird's systems can optimally carry

out their functions of energising, cleansing, building, balancing and protecting living tissue every day.

Disease Conditions: If the birds show signs of being challenged, increase the amount of **Cell-Pet™** (up to a ratio of 1:1,000) being added to the drinking water at the time, to boost the birds' ability to resist disease.

A bird cannot overdose **Cell-Pet™**. Its bodily systems will simply eliminate any unused excess. The rate of detoxification is however determined by the quantity of **Cell-Pet™** added to the drinking water.

When birds are not as yet used to the inclusion of **Cell-Pet™** in their drinking water, care must be taken to ensure that the prescribed quantities are not exceeded initially.

Unique Oxygen and Super-energized Product

* **Oxygenation:** **Cell-Pet™** is a di-pole proprietary formulation, invented by Everett Storey, a renowned physical chemist and microbiologist, and the patentee of the hydrogen bomb. He received recognition from Albert Einstein for his work on hydrogen and oxygen atoms, and his "*water splitting technology*". **Cell-Pet™** triggers the dissociation of hydrogen and oxygen atoms from water molecules in the blood stream, immediately supplying nascent oxygen and hydrogen atoms at cellular level.

Super-energized: Using his knowledge of bipole ionic, subatomic interactions, and quantum mechanics, together with proprietary technologies of Micro-activation™ and Electroculture™, Storey electrostatically induced all the electrons in his formulation with a uni-directional vortex spin that was defined as being "super-energized", i.e. life-enhancing.

Precautions

For animal use only. Keep bottle away from children. Avoid contact with natural organic and petroleum based materials (e.g. leather, silk, cotton, linen, wool). **Cell-Pet™** contains enzymes that may break down these organic materials.

Oxygen For Life (Pty) Ltd, and Nu Science Corporation USA make no medical claims or otherwise for the treatment, prevention, cure or mitigation of disease. If your birds have a medical condition, we recommend you consult a Veterinarian.

(Revised: 02.10.2013)

Cell-Pet™

Registration Number V25403

Act 36 of 1947

South African National Department of Agriculture

Super-energized®
Concentrated Oxygen Mineral
Supplement

for

BIRDS (All Types)

Cell-Pet™ is manufactured by Nu Science Corp. U.S.A. and is based on the same technologies as **Cellfood®**, the oxygen mineral nutritional supplement (for humans).
