

Cellfood® — a powerful catalyst for increasing oxygen levels within the body

### Analytical Report: Dissolved Oxygen

Conducted by Bioscreen Testing Service, Inc. 3892 Del Amo Boulevard, Ste, G-5, Torrance, CA

Report Date:	07/13/99	Project #	83454
Date received:	06/25/99	Reference#	715-061
Date test completed:	06/29/99		

---

#### What the test means:

The Analytical Test for Dissolved Oxygen tests for the the amount of dissolved oxygen in water, and can demonstrate an increase in dissolved oxygen over time.

---

#### Sample Description:

ACC#:	Sample:	Test Performed:	BTS Method:	Lot:
83450	Cellfood®	Dissolved Oxygen	M506.R1	ROM623 exp 3/2001

---

#### Results:

	<u>Amount of dissolved oxygen</u>	
	<u>At time 0</u>	<u>After 5 minutes</u>
Purified Deionized Water (control)	5.6 mg/L	5.6 mg/L
	<u>At time 0</u>	<u>After 5 minutes</u>
With Cellfood added	5.6 mg/L	7.3 mg/L

---

#### Discussion:

Ten (10) drops of Cellfood were added to 8 oz. of purified, deionized water. Dissolved oxygen measurements were taken at time 0 and at 5 minutes.

*Signed: Shawn Sparks, Chemistry Supervisor*

#### Lumina Health Products note:

This shows a 30% increase in oxygen in just 5 minutes! (This percentage will continue to increase for days as the water-splitting effect continues.)
